

## Apprentice Maintenance Engineer

### Wafer Technology Ltd - Tongwell

Wafer Technology Ltd. Is a U.K. based producer of III-V materials and epitaxy-ready substrates. The company has a long and well established history in the manufacture of compound semiconductors and offers the widest product range in the business. Wafer Technology's unrivalled choice of materials types and forms enables it to support almost any customer application.

The successful candidate will be working within the site Facilities team to maintain an extensive range of process equipment and a wide range of site services rarely found all together on one site.

#### Key responsibilities:

- Carry out daily inspections of site services including compressed air systems, cooling towers, coolant and process water ring mains, deionised water plant, high pressure gas pipework
- Maintain air handling units and extraction systems including a class 1000 clean room
- Reporting any discrepancies to the manager and assisting with any rectification tasks required
- Assisting with fault finding and repair of a wide range of productions process equipment involving working on pneumatic, hydraulic, electrical and electronic systems
- Carrying out planned preventative maintenance tasks
- Maintaining and updating equipment and site services records
- Carry out minor repairs to site infrastructure

**Annual wage: £10,400**

**Working week: 37.5 hours per week, Monday – Friday, 8:00am – 4:30pm**
